

## traser H3 bracelet wrist size Measure

If you wish for us to adjust your watch bracelet to the correct size before you receive your watch then follow the steps to measure your wrist.

\* Press "print" from the top toolbar →

\* In the "Page Handling" options select "Page Scaling" to "none"  
(This ensures that the ruler is printed to the correct scale) →

Cut out the the rule along the dashed lines and wrap it around where your watch would go.

Your wrist size in cm is where the larger number touches the "0" interval as indicated by the arrows

Note: To ensure a more accurate measurement we have marked off 1/2 cm intervals between the sizes

e.g if your size falls on the smaller line between the 16 and 17 then your wrist size is 16.5cm.

When you have finished you can put your size in the "comments" box during checkout
